WORK EXPERIENCE

ABC Technologies Pvt. Ltd – State, Country

Software Engineer

Jan 2020 – Present

- Client interaction and analysis, estimation, architecting and development of the feature requests.
- Gained significant knowledge in file management (upload, download and view).
- Demonstration of the application to the senior executives at the client side (U.S.), after each iteration.
- Pixel perfect UI development.
- An internal employee management application was created for easing the process of vacation requests, daily status updates, reimbursement requests, and work from home requests of an employee. Employees are able to perform all these activities through the mobile application that stands out in both design and functionality richness.
- Developed a video calling application to be used in the healthcare domain so that the end users (Hospital staffs - Doctors, Nurses, etc.) can video call Agents (experts in the medical field) for any assistance. This is a supplementary product provided to any hospital along with the main healthcare platform.
- Firebase push notification service was integrated for informing the users about an incoming call.

XYZ Technologies Pvt. Ltd – State, Country

Software Developer

Jul 2018 – Jan 2020

- A customer loyalty mobile application was developed which enabled the users to gain points on their local store purchases. These points can be later redeemed on purchases.
- OpenCV based image comparison API was developed for sorting the products in the warehouse based on the order image. This significantly improved the speed of processes in the warehouse.

CCC – State, Country

Intern

Jul 2017 – Aug 2017

- Worked in this dentistry based software product company and developed a web portal in Django for automating Dentist - Lab interaction.

EDUCATION

UNIVERSITY NAME – State, Country

Apr 2018

Bachelor of Technology (B.Tech), Computer Science
